King Electric Introduces LPW ECO2S PRO and PX ECO2S PRO Wall Heaters

Wireless 7-Day Programmable Comfort Control for Residential & Commercial Spaces

Seattle, WA – 1/27/26 – King Electric today announced the launch of its new **LPW ECO2S PRO** and **PX ECO2S PRO Smart Wall Heaters**. Designed for residential and light commercial spaces, these next-generation heaters pair high-efficiency 2-stage heating with the new **ECO PRO 7-Day Programmable Wireless Controller** to deliver superior comfort, energy savings, and flexible installation.

The **LPW ECO2S PRO** builds on King's proven LPW platform with a modern, architectural design for homes, offices, and commercial spaces. It features dual Pic-A-Watt® elements, 2-stage heating, adaptive energy management, and full compatibility with the **ECO PRO** Wireless Controller for optimal thermostat placement and comfort.

The compact **PX ECO2S PRO** is the next generation of small-format wall heaters, ideal for bedrooms, offices, and smaller rooms. It offers fast, quiet heat with full **ECO2S PRO** functionality, four designer finishes, and an optional surface-mount trim ring for easy installation in both retrofit and new construction.

Both heaters pair with the **ECO PRO Wireless Controller** for advanced scheduling, precise temperature control, and multi-zone operation - no control wiring needed. Optional Window and Occupancy Sensors enable automatic setbacks for energy savings and long-term efficiency.

"These new ECO2S PRO wall heaters represent an exciting evolution in King's smart heating lineup," said Dean Wilson, CEO of King Electric Manufacturing Co. "By combining wireless control, 2-stage heating, and a fully programmable schedule, the LPW and PX ECO2S PRO models deliver a powerful, modern solution for virtually any residential or commercial space."

The launch of the **LPW ECO2S PRO** and **PX ECO2S PRO** reinforces King Electric's commitment to American-made, energy-efficient, and code-compliant heating solutions designed for today's connected buildings.

About King

Since 1958, King Electric has manufactured American-made smart heating solutions, building a legacy of trust and delivering unparalleled reliability.
