

## NEW! Improved EZ Backwire Design

APPROVED DESIGN

## NEW! EZ-Connect a Quicker Installing Back-wire with integral Strain Relief Design

With the innovation of the all new EZ-Connect<sup>™</sup> Quicker Installing back-wire design, contractors all agree; installation has never been faster! This new design allows the convenience of wiring the heater prior to mounting onto the wall. Simply make the electrical connection, secure the back-wire cover plate with the integral strain relief onto the back of the heater and then mount the heater onto the wall. It's that easy! No need to remove the front cover during installation. This cuts installation time in half.

## V-Effect<sup>™</sup> Airflow Design since 1958!

For the last 60 years, King baseboards have featured V-Effect<sup>™</sup> Airflow Design, which increases airflow draw and adds incredible impact resistance to the front cover. The asymmetrical V-shaped front cover acts in the same way a wing creates lift, to draw the hot air out of the heater. This efficient use of natural aero-dynamics increases the air thrust from the heater, more efficiently warming the room. In addition, the V-shape adds rugged cover strength and limits furniture from a 100 % blockage of the heater.

## Now That's Smart!
