

TW2 SERIES

Designer Series

HIGH-OUTPUT, MEDIUM-WAVE ELECTRIC INFRARED HEATER

Effectively heats the surrounding space while subtly illuminating the area

The TW2 Series is a high wattage, commercial grade electric heater offering Woven Tungsten elements that produce a high-output medium-wave infrared heat energy with a visible orange glow. A great choice for outdoor patios and applications where high heat is required with a minimal glow. Heaters are equipped with a specially designed reflector for optimal radiant heat output. Optional wall mounting brackets allow adjustment of the heating direction.

BENEFITS OF HEATING WITH ELECTRIC INFRARED

- Superior Comfort
